ABOUT ME

As a dynamic and solution-oriented Machine Technician, I contributed to the production processes at Melike Tekstil with 6 years of experience. I developed my professional knowledge and practical skills with a high school diploma. As a professional who is team-oriented, responsible, and open to development, I am excited to participate in new projects and increase success. I would be delighted to join your team and contribute to our shared success.

WORK EXPERIENCE

2019
2020

MACHINE TECHNICIAN
Melike Tekstil | Gaziantep

- Expertise in machine manufacturing and production processes, developing efficiency and quality-focused solutions
- Providing fast and seamless operations during installation, assembly, and start-up phases
- Maintenance, repair, and optimization of textile production machines to enhance production continuity and performance
- Reducing costs and increasing efficiency through production line design and process improvements
- Applying quality control and safety procedures in accordance with industry standards
- Ability to read technical drawings and schematics
- Problem-solving and troubleshooting skills
- Ability to adapt to teamwork
- Proficiency in occupational safety and procedures
- Ability to perform machine maintenance and repair
- Fast and careful work habits
- Knowledge of electrical and mechanical systems

2022
2023

MACHINE TECHNICIAN
FELLOW ENERJİ | Gaziantep

- Expertise in machine manufacturing and production processes, ensuring high quality and efficiency
- Fast and error-free application during installation and assembly phases, saving time and cost
- Developing optimized solutions in start and setup processes to shorten production times
- Providing sustainability-focused solutions by integrating machines and equipment in renewable energy projects
- Monitoring and reporting production processes
- Diagnosing and solving malfunctions
- Supporting the installation of new machines
- Working in accordance with quality standards
- Showing aptitude for teamwork
- High problem-solving skills
- Reading and applying technical drawings

2023
2025

MELİKE TEKSTİL
Machine Technician | Gaziantep

- Increased textile production efficiency by providing expertise in machine manufacturing, production, installation, assembly, and start-up processes.
- Ensured high quality and production speed with a total of 14 machines in combed cotton and carded yarn production.
- Optimized production capacity with a total of 20 machines in carding and suppository machines.
- Conducted a total of 34 setups in textile production processes, ensuring seamless and efficient operations.
- Monitoring and reporting production processes
- Ability to work in accordance with quality control standards
- Ability to perform machine and equipment maintenance
- Aptitude for teamwork and communication skills
- Fast and careful work habits
- Habit of maintaining cleanliness and order
- Identifying problems and developing solution proposals
- Providing suggestions to increase efficiency

APR 2025
PRESENT

MACHINE MAINTENANCE AND REPAIR FOREMAN
Şireci Tekstil | GAZİANTEP

- Managed machine installation and maintenance processes to increase production efficiency.
- Performed maintenance and repair of Rieter machines (E90, SD 55, F40) to minimize downtime.
- Optimized machine performance on the production line to achieve high quality and production targets.
- Directed the technical team to provide effective coordination and quick solutions in maintenance and repair processes.
- Demonstrated expertise in machine installation and commissioning to shorten production times.
- Performed maintenance and repair of machines used in carded and combed yarn production (Total, Rieter) to prevent operational delays.
- Prepare and implement machine maintenance and repair plans
- Diagnose malfunctions and produce quick solutions
- Direct and coordinate maintenance teams
- Identify and procure spare part needs
- Perform periodic maintenance operations
- Monitor and report machine performance
- Keep maintenance records regularly and report
- Ensure communication within the team and solve problems
- Follow new technologies and maintenance techniques

EDUCATION

2019

HIGH SCHOOL DIPLOMA
Özel Gaziantep OSB Koleji Teknik | Gaziantep

- Field of Machine Technology/Computerized Machine Manufacturing
- Acquisition of basic engineering principles and technical knowledge
- Design and production processes in accordance with industry standards
- Use and applications of CAD/CAM software
- Machine maintenance and repair techniques
- Safety and quality control procedures
- Use of machine tools and production equipment
- Specialized in the field of machine technology and gained practical skills
- Increased my earnings with relevant courses and projects
- Enhanced efficiency and quality with result-oriented education
