

❖ PROFESSIONAL EXPERIENCES

June 2022 – July 2022 Noisy le grand, France

STEWARDSHIP MANAGER – GSS EVENT

- Having the will to improve my competence in management, this mission gave me the opportunity to take command of a team of about twenty people.
- The goal of my team was to solve stewardship problems throughout the exploitation. Their roles were to provide human and material support for all event managers.
- My roles were to schedule and organize the deployment of my team, in order to optimize the different resources.
- Reporting directly to the operations manager, I had to monitor actions and propose solutions to various problems.
- The event went off without a hitch; I was able to take advantage of my skills in management of team, storage and emergencies.

January 2020 – February 2022 Paris, France

RESERVIST CORPORAL – French land army (ARMÉE DE TERRE)

- Enlisted in an Infantry regiment, I spent two years as a reserve corporal in charge of a small team.
- Performing in territory protection missions, my roles were to take on the management of a team in order to patrol.
- I also participated in troop training; our purpose was to put up resistance so that they could practice. During these exchanges we have been trained in several disciplines.

September 2019 – October 2021 Villeneuve le roi, France

LOGISTICS PERFORMANCE IMPROVEMENT PROJECT MANAGER – AIR FRANCE INDUSTRIE

- Analysis and advice on stock levels to improve the logistics performance and maintenance time of the Boeing 777.
- Making recommendations on the management of aeronautical equipment, my role was to define a strategic vision in the investment and sale of equipment.
- During the pandemic wave, my role was to propose safeguards to reduce our daily losses.
- Project management to attract new Asian clients.

Agost 2018 – October 2019 Évry, France

LOGISTICIAN – ARIANESPACE

- Aerospace element transport planner for future launch. Documentary quality guarantee for the transport of rocket parts.
 - Compare support offerings to match our needs and industry specifications.
 - Representation of the service when loading the different elements of the launcher, in order to guarantee the correct tracking of the shipment.
-

September 2016 – August 2018 Le Bourget, France

SCHEDULER – AIRBUS

- Management and support of production services for the manufacture of H125 blades.
- Implementation of production management means (Gantt/PIC/PDP/KPI) for manufacturing.
- Management of production emergencies by negotiating with the various stakeholders (customers, support, purchase, production).
- Continuously improve the internal and external processes of the programming service.
- Supervision of the project to reintegrate the production of helicopter blade components from a logistical, purchasing and production perspective.

July 2016 – August 2016 Orly, France

AIR TRANSIT OFFICER – WFS

- Tracking of regulatory documents for goods stored at the edge of the runway prior to boarding.
- Creation of documentary bundles to ensure compliance with various aeronautical constraints and regulations for stopover managers.

❖ EDUCATION AND TRAINING

July 2019 – October 2021

MASTER'S DEGREE IN PRODUCTION MANAGEMENT, LOGISTICS, PURCHASING - LOGISTICS PROJECT MANAGEMENT – Panthéon-Assas, Paris II

- My master's training is based on upgrading the fundamentals of management sciences and technological innovations.
- Logistics Project Management Track Record: specialization focused on various cross-functional production businesses such as purchasing, supply chain, accounting, law and human resources.
- The master's degree also opens on the mastery of many techniques and technologies for the optimization of material, financial and information flows within the «extended» company.
