Experience

Tengizchevroil

(Bolashak Atyrau LLP)

Location: Tengiz - FGP

Department: FGP Power Operation

Position: Power operation planning consultant

10.2021 - 11.2024

- Leading as the coordinator for the electrical maintenance group within the distribution team, managing and overseeing the execution of all electrical maintenance tasks, ensuring efficient operation and providing strategic direction to ensure optimal performance and safety of the distribution systems.
- Developing strategies and overseeing maintenance planning for preventive and corrective maintenance activities in the FGP Power operations, ensuring reliability and safety across all systems.
- Ensuring collaboration with systems completion teams, actively participating in Mechanical Completion (MC) and Ready for Startup (RFSU) walkdowns, and maintaining high-quality standards and adherence to deadlines.
- Leading winterization preparation, coordinating technical teams and ensuring readiness for seasonal demands and operations.
- Participating in Pre-Startup Safety Review (PSSR) walkdowns, ensuring alignment with technical documentation and safety protocols.
- Automating reporting and data presentation processes using JDE, Excel and Power BI, streamlining decision-making and operational efficiency.
- Planning and coordinating equipment acceptance, from Mechanical Completion (MC) to Ready for Operations (RFO).
- Organizing vendor training sessions for electrical engineers, ensuring up-to-date knowledge on new technologies and equipment.
- Supporting the Management of Change (MOC) process by conducting functional tests, verifying changes, and updating related documentation.
- Assisting in the commissioning of new electrical systems, developing operation manuals, and creating safe switching procedures for new facilities.
- Supporting plant operation and maintenance teams by addressing diverse questions and tasks.

- Contributing to the development of electrical equipment operation manuals for new projects, along with standard operating instructions and electrical switching protocols for new facilities.
- Furnishing technical documentation, drawings, and diagrams to the Engineering and Construction groups pertaining to the current electrical installations and equipment managed by TCO Power System Operations.

KENTECH (KENT)

Location: Tengiz - FGP

Department: Project control

Position: E&I system Work Face Planning Engineer

04.2019 - 10.2022

- Identifying risks associated with planned activities, with a primary focus on I/O scheduling and mitigating constraints.
- Coordinating with project planners, coordinators, and managers to provide detailed work face construction information and requirements.
- Preparing comprehensive Installation Work Packages (IWPs), including identification of necessary activities, resources, materials, site-specific conditions, and quality control measures.
- Reviewing Construction Work Packages (CWPs) and IWPs with project supervision to ensure alignment with daily and weekly work plans.
- Ensuring efficient execution of IWPs by facilitating smooth communication between field personnel and project teams.
- Collaborating with engineers and managers for the execution of IWPs, ensuring all materials, tools, and equipment are in place.
- Compiling and managing material matrix lists for work activities, ensuring compliance with GOST, SNIP, and client standards.
- Recording and tracking man-hours, equipment usage, and quantities during the execution of work packages to monitor progress.
- Developing job sequencing, test matrices, and inspection procedures for all construction activities.
- Ensuring proper installation of electrical, instrumentation, and F&G systems, including equipment such as 110KV Gantry, HV/MV/LV distribution boards, transformers, cable trays, grounding systems, and related components.

SITEK Caspian LLP

Location: Eskene West (Karabatan) - Turnaround

Department: E&I turnaround

Position: E&I Work Pack

01.2019 - 04.2019

- Created detailed method statements, risk assessments, and work descriptions to ensure safe and efficient execution of construction activities.
- Developed and structured work packs that included task breakdowns, required resources, and estimated man-hours, optimizing project planning and execution.

- Conducted field surveys and collaborated with engineering teams to identify potential constraints and develop mitigation strategies.
- Assisted in the execution phase by providing technical guidance to construction teams and ensuring work was carried out according to specifications.
- Coordinated closely with QA/QC teams to ensure compliance with project requirements and facilitated timely inspections and approvals.
- Regularly monitored project progress, prepared status reports, and communicated updates to stakeholders, contributing to improved workflow and efficiency.

CONSOLIDATED CONTRACTING ENGINEERING & PROCUREMENT S.A.L

Location: Tengiz - FGP

Department: QA/QC

Position: QA/QC RA assistant

01.2018 - 01.2019

- Monitored contractor performance, ensuring compliance with schedules, quality standards, and project specifications.
- Managed project logs and documentation for subcontractor control, maintaining up-to-date records.
- Conducted quality control assessments and risk analysis for acceptance commissions, ensuring adherence to regulatory requirements.
- Collaborated with engineers and inspectors to verify compliance with construction standards and safety protocols.
- Assisted in drafting and reviewing official reports, ensuring clear and precise documentation.

LOGIC SERVICE KAZAKHSTAN

Location: Atyrau - Logic service, KazStroyService, Gate bases

Position: Internship as Instrumentation & electrical technician

03.2017 - 04.2017

- Active participation in the adjustment and calibration processes of Level transmitters and Fire Safety Panels.
- Contributed to the installation of the Fire and Gas (F&G) system

NORTH CASPIAN OPERATING COMPANY

Location: Eskene West (Karabatan)

Position: Internship in the production technical support department

- 01.2017 - 02.2017
- Active participation in Sulphur Export and Row Gas Injection audits alongside consortium partners including KazMunayGas, Eni, ExxonMobil, Royal Dutch Shell, Total S.A., China National Petroleum Corporation, and Inpex.
 - Assistance in the preparation of Kick-off meetings for audit initiatives.
 - Accompaniment of auditors to the Karabatan oil field - specifically, the Eskene West Railway Facility (EWRf).

Education

2014-2017

APEC PETROTECHNIC HIGHER COLLEGE

Electrical technician

2017-2017

SOUTHERN ALBERTA INSTITUTE OF TECHNOLOGY

Petroleum Field Operator

2014-2019

ASTRAKHAN STATE TECHNICAL UNIVERSITY

Operation and maintenance of oil and gas production facilities, gas condensate and underground storage facilities

Languages

- Kazakh - Proficiency
- Russian - Advanced
- English - Upper-Intermediate
- Turkish - Beginner

Certificates, Trainings and additional technical skills

Certificates:

- Foundation course in English from Southern Alberta Institute of Technology
- Petroleum Introduction Overview courses from Southern Alberta Institute of Technology
- Fire safety Basics
- Industrial Safety
- Occupational and health safety environment
- Work at high
- Qualified electrical person
- Isolation of hazardous energy
- System completion trainings
- AvonHood trainings
- HSE induction courses (TCO, NCOC, YKK, SEFTEC)
- Respirator Fit Test Card
- Basic Live Support (YKK & SEFTEC)

Technical Skills:

- JDE-E1
- SAP
- Proficient in the Microsoft office Suite
- Dashboard
- Atlas
- Smart Plant 3
- Smart Plant Overview EDMS
- Core Worx
- POL
- CMS
- AutoCAD
- Nitro
- Navis work
