Proven track record in optimizing operations, managing complex logistics environments, and leading cross-functional teams. Adept at implementing cost-saving measures and enhancing operational performance. Currently seeking a leadership role within a dynamic Supply Chain or Logistics department.

PROFESIONAL EXPERIENCE

September 2022 - August 2024

Corbion PURAC Biochem BV, Logistics Specialist - 3PL Manager, Gorinchem, THE NETHERLANDS

Oversaw operations of external warehouses, encompassing the management of approx. 25 000 pallets (DG; Non DG; Parma; Cold products), 8 external tanks, and containers storage activities in the Netherlands. Expertly managed import / outbound flows and provider relationships, efficiently addressed vendor incidents and complaints; and handled all inquiries related to warehousing activities.

- **Monitoring** daily warehousing operations for inbounds / outbounds deliveries to Customers; Production Site in Gorinchem and Contract Manufacturing.
- **Creation** of Logistic Dashboard for cost monitoring of Warehousing activities and Operation Performance.
- **Elaboration** of SOP for warehousing with regular reviews and updates linked to operation requirements.
- **Reviewing / approving** invoices from 3PLs. Keep **controlling** on demurrage / detention costs.
- **Preparing, analyzing and leading** Business Review Meetings with suppliers and Senior Management to review and ensure respect of KPIs as per contractual agreements.
- **Monitoring** stock accuracy in external Warehouses by monthly stock reconciliation and physical stock checks. First point of contact of providing activity forecast to the 3PLs.
- **Ensuring** logistics Corrective Actions / Preventative Actions related to customer / vendor complaints; following on CAPA implementation and CAPA effectiveness.
- **Supporting** different Corbion stakeholders on daily base: QA; Finance; Global and Local Supply Planning; Production Site; Contract Manufacturing.
- **Performed** final part of Warehouse transfer from previous to the current 3PL (5 000 pallets).
- **Managed** DG goods Warehouse transfer (Class III, XVIII, IX) between 2 warehouses in order to get 1 distribution center.
- **Demonstrated financial** acumen by identifying potential savings of 55K€ through a meticulous review of invoices.

May 2021 - August 2022

BioMérieux Sweden, Nordics Logistic Referent, Göteborg, SWEDEN

Charged with overseeing the successful operation of the Swedish 3PL Warehouse, including inbound logistics, managing outbound stock for Nordic destinations, supervising shipping operations, and coordinating daily deliveries to consignees with a strategic focus on achieving a 7 % cost reduction.

- **Ensured** company processes applied by the 3PL; **monitored** performance; and **validation** of 3PL (monthly basis).
- Kept Operational **On Time in Full (OTIF)** to minimum 96%.
- **Managed** stock accuracy (via **stock take**) and **performed scraps** for short shelf life items, phase outs, poor quality items, damage in transit, etc...
- **Supported FSE's operations: STO's creation**; expresses orders; stock update when goods received.
- Performed **customer returns orders** from the Nordics to France (orders cancelled, Dead on Arrival, replacements).
- **Analyzed customers and FSE's behaviors** to **optimize** the transport flow (environment impact,...).
- **Demand planning: Replenishment; life cycle management; allocation due to back orders; Master Material flow.**

August 2020 - February 2021

BioMérieux SA, Supply Chain Project Manager, Craponne, FRANCE

Successfully implemented a Reagents Drop-shipment solution for ASEAN Export Distributors as part of the RDC ASPAC Project, aimed at optimizing tax efficiency, with the initiative going live in January 2021.

- **Wrote User Requirements Specification (URS), User Acceptance Testing (UAT)** and defined expectations of new solution (**virtual stock movement**; new documentation layout to be **customs compliant**; with no regression on existing drop-shipment solution).
- **Performed Dry Run** and all other tests with the Key Stakeholders.
- **Managed Material Master Data**: cleansing and integration of the items into the new Singapore plant + Duplication / creation of **new views** into SAP (storage, accounting, sales, purchasing, etc...).
- **Monitored** progress of shipments in order to ensure a smooth landing via the **Hypercare** as well as the KPI's calculation (International Sales Administration, Finance & Logistics).

March 2019 - July 2020

BioMérieux China Ltd, Regional Supply Chain Specialist ASIA PACIFIC, Shanghai, CHINA

Collaborating closely with the Regional Supply Chain and Global Logistics Team by adhering to Corporate Supply Chain guidelines, **support and implement strategies**, and constantly **enhance** supply chain operations to boost overall performance.

- **Analyzed**, maintained and **managed logistic dashboard** to monitor performance and KPI's.
- **Supported** locals supply chain managers to define follow up actions and implement improvements.
- Identified opportunities of **process improvement and cost saving** within logistics function.
- **Maintained end-customers specificities** in terms of logistics services provided by BioMérieux (packaging, shipping conditions, certificates,...).
- **Identified** opportunities of good practices deployment for the **Supply Chain Offer** into the ASPAC region.
