## Hobbies

-  Volleyball, First class athlet
-  Judo, Second sports category

## Education

### Bachelor's degree 2013 - 2017

Ufa State Petroleum Technology University, Ufa

- Oil and Gas
- Design and Operation of Equipment for the Oil and Gas Industry
- Technologies for Upgrading and Improving the Efficiency of Equipment Maintenance
- Analysis of Equipment Wear and Failure Causes
- Operating Principles and Technical Characteristics of Rotating Equipment

### Master's degree 2018 - 2021

Ufa State Petroleum Technology University, Ufa

- Management Accounting and Controlling in the Oil and Gas Industry

## Work experience

### Mechanical Engineer of Rotating Equipment 2019 - Сейчас

LLP TCO, Tengiz

- Ensuring trouble-free and reliable operation of all types of equipment, exploitation, timely high-quality repairs and maintenance; work on its modernization and increasing the efficiency of equipment maintenance;
- Acceptance and installation of new equipment, work on certification and rationalization of workplaces, modernization and replacement of inefficient equipment with high-performance equipment and the introduction of mechanization tools for heavy manual and labor-intensive work;
- Organization of accounting of all types of equipment, as well as those that have worked out the depreciation period and are obsolete, preparation of documents for their disposal;
- Development and analysis of equipment operation to improve reliability and reduce downtime
- Repair of all types of pumps, mechanical seals, installation, dismantling of equipment, alignment of the pump;
- Identification of the causes of premature equipment wear, taking measures to prevent and eliminate them;
- Consideration of innovation proposals and inventions concerning the repair and modernization of equipment.
- Skills in conducting balancing
- Skills to undertake alignment
- Repair of all types of rotating equipment
- Awareness of devices and equipment
- Skills of repair and crimping of all types of mechanical seals
- Vibration measurements
- Equipment alignment
- Work in SAP system

### Mechanical Engineer, Investment Project 2018 - 2019

Manager

LLP Zenit, Uralsk

- Ensuring uninterrupted and technically correct operation of equipment, increasing its interchangeability and maintenance in working condition at the

■ Football

■ Table Tennis

required level of accuracy;

- Study of the causes of increased equipment wear, its downtime, conducting accident investigations, developing and implementing measures to eliminate and prevent them;
- Quality control of equipment installation, rational spending of funds for major repairs, correct storage of equipment in warehouses;
- Registration of applications for the purchase of materials and spare parts required for the operation of equipment and devices;
- Control and compliance with safety measures at the enterprise during repair work;
- Purchase of materials

### **Mechanic of Rotating and Static Equipment**

**2017 - 2018**

JSC Condensat, Aksay

- Ensuring uninterrupted and reliable operation of rotating and static equipment
- Performing repair work on all types of pumps and mechanical seals
- Analysis of equipment wear causes and development of corrective actions
- Carrying out modernization and optimization of equipment maintenance
- Ensuring compliance with safety regulations and standards during equipment repair and maintenance

## Courses

---

**H2S Certificate**

**Confined Space Work Certificate**

**Working at Heights Certificate**

**First Aid Certificate**

**Safe Excavation Work Certificate**

**Hazardous Energy Isolation Certificate**

**Rescue Operator Certificate**

**Safe Handling of Hazardous Chemicals Certificate**

**Respiratory Protection Certificate**

**Vibration Diagnostic Category 1 Mobius**
