

Dominic Escribano

704 Woodgate Cir Enfield, CT 06082 | (413) 306-2875 | www.linkedin.com/in/dominic-escribano-7902a3277

Motivated and detail-oriented Electrical Engineering graduate with a BS in Electrical Engineering and hands-on experience in automation, process optimization, and project management. Currently working as an Innovation and Automation Analyst, where I've applied my engineering background to streamline processes and integrate technologies. Strong foundation in critical thinking, problem-solving, and collaborative teamwork. Eager to contribute to a team focused on innovation and cutting-edge technology.

Experience

INNOVATION AND AUTOMATION ANALYST | RISKSMTIH INSURANCE SERVICES | JULY 2023 – PRESENT

- Lead development and implementation of automation solutions to streamline business processes for the underwriting team using Microsoft Power Platform (Power Automate, Power Apps, Power BI).
- Collaborated with cross-functional teams to identify inefficiencies and improve workflows across SharePoint, SQL Server databases, and shared email systems
- Enhanced operational efficiency by reducing manual tasks, accelerating data entry, and increasing data accuracy and consistency.
- Trained and mentored team members on automation best practices, fostering a culture of continuous improvement.

GROCERY SPECIALIST | BIG Y FOODS | OCTOBER 2016 – JULY 2023

- Managed product stocking and inventory for assigned grocery sections, ensuring products were organized, rotated, and displayed according to store standards and company policies.
- Worked closely with team members and store management to improve product placement and sales through effective merchandising and efficient store layout planning.
- Trained new employees on grocery department operations, including product rotation, stocking techniques, and customer service best practices, ensuring new hires could contribute effectively in a short time frame.

Education

B.S. IN ELECTRICAL ENGINEERING | JUNE 2023 | WESTERN NEW ENGLAND UNIVERSITY, SPRINGFIELD, MA

Abilities

- Collaborative team player with experience in agile environments, facilitating partnerships between IT and business units, and project management.
- Strong analytical and redesign capabilities rooted in engineering principles, applied to optimize systems and processes.
- Curious and self-driven learner with a track record of rapidly mastering new technologies and tools.

Technical Skills

- SQL Server Management Studio
- Power Platform (Power Apps, Power BI, etc)
- Jira
- Microsoft Office Suite
- MATLAB
