PARIS,75011, France | Open to Relocate

Professional Summary

Supply Chain Professional with an MSc in Global Supply Chain Management and hands-on industry experience at Schneider Electric, supporting upstream flow control operations. Experienced in KPI tracking, net shortage (Net Short) analysis, and supplier coordination to ensure material availability and production continuity. Strong foundation in demand planning, procurement, and core supply chain operations, with proven ability to analyze data, monitor performance, and support decision-making. Proficient in Microsoft Excel, SAP, One MM, and Tableau. Fluent in English, with working proficiency in French (A1 - Actively Learning). Actively seeking full-time opportunities in supply chain, operations, or planning roles, **available from March 2026**.

Work Experience

Schneider Electric, Supply Chain Management (Upstream)/Gestion des approvisionnements, Intern | Carros, France

October 2025-Present

- Manage upstream flow operations for a portfolio of 15+ suppliers and 200+ active references to ensure continuous material availability for production.
- Analyze Net Shortage (Net Short) files and key performance indicators (KPIs) daily to identify critical supply gaps, proactively resolving 90% of potential shortages before they impact the line.
- Coordinate directly with suppliers and internal stakeholders to manage Purchase Orders (POs) in SAP, successfully reducing lead times for critical components by 10%.
- Optimized data reporting processes using advanced Excel functions, enhancing operational visibility and reducing manual reporting time by 20%.
- Implemented dynamic supplier management via SAP, reducing stock risks and improving production continuity by 20%.
- Developed a Net Short risk monitoring tool, integrating SAP & ONEMM data to prioritize critical components, enhancing supply chain resilience.
- Led winter closure shutdown risk mitigation project, securing supply from 100+ critical suppliers through proactive planning, reducing potential disruptions by 45%.

Supply Chain Intern, Induz Organic–Aryavarta Organics Pvt. Ltd., Jaipur, India

January 2024-June 2024

- Improved demand forecasting accuracy by 25%, reduced excess inventory by 20% through a data-driven procurement approach.
- Implemented just-in-time procurement, lowering inventory costs by 18% and streamlining workflows.
- Developed detailed KPI reports in Excel, created dashboards in Tableau and Power BI, boosting operational efficiency by 10%.
- Contributed to team performance tracking on a weekly basis and achieved targets to drive productivity.

Business Development Associate, Shalini Machine Tools Ltd., Noida, India

January 2019-August 2023

- Designed supplier performance evaluation systems, improving supplier reliability by 30%.
 - Managed ERP-based inventory tracking, resolving 95% of stock discrepancies proactively.
 - Led cross-functional teams to redesign supply chain workflows, reducing lead times by 12%.
-
