Highly motivated and results-driven Technician with a collaborative mindset and strategic leadership abilities. Known for an organized approach, strong work ethic, and the ability to build long-lasting professional relationships. Skilled in technical troubleshooting, problem-solving, and critical analysis. Committed to delivering efficiency and impactful results in the industry.

Experience

Lead Mechanic

PrimeFlight Aviation • Seattle, WA

11/2024 - Present

- Oversee the completion of all work orders, ensuring timely execution, accuracy, and compliance with client standards.
- Inspected, maintained, and repaired mechanical components, including engines, brake systems, and body assemblies, to ensure optimal performance and safety.
- Diagnosed and resolved complex mechanical, electrical, and hydraulic issues in accordance with manufacturer specifications and safety standards.
- Performed routine servicing of equipment, including replenishing fuel, oil, and hydraulic fluids, to maintain operational readiness.
- Operated and tested ground support equipment to assess functionality and verify successful repairs and maintenance actions.
- Coordinate and track parts usage and inventory to support ongoing maintenance and reduce downtime.
- Conduct regular inspections, troubleshoot issues, and implement corrective actions to maintain operational reliability.
- Ensure adherence to safety protocols, company procedures, and aviation industry regulations.
- Train and mentor new team members to ensure high-quality work and promote continuous improvement.
- Prepare and submit detailed reports on maintenance activities, labor hours, and parts usage for both internal and client review.

Diesel Mechanic

Ryder Truck Rental & Maintenance • Seattle, WA

01/2024 - 11/2024

- Supervise and coordinate a team of mechanics, ensuring all maintenance and repair tasks are completed on schedule and in compliance with contract requirements.
- Oversee day-to-day shop operations, prioritizing workloads and assigning tasks to ensure operational readiness of fleet vehicles.
- Serve as the primary point of contact for contract performance, consistently exceeding client expectations through efficient service delivery.
- Perform advanced diagnostics and repairs on diesel engines, fuel systems, brakes, electrical systems, and exhaust systems.
- Ensure all work meets federal and state safety/emissions standards and internal quality protocols.
- Maintain accurate records of repairs, parts usage, and preventive maintenance schedules.
- Mentor junior technicians and provide on-the-job training to strengthen team capabilities and performance.

Field Service Technician

Fairbanks Morse Defense • Seattle, WA

12/2022 - 01/2024

- Diagnosed and repaired electrical circuits, pumps, valves, motors, and production machinery.
 - Installed electrical wiring and components based on blueprints and specifications.
 - Conducted preventative maintenance on critical systems and equipment.
 - Utilized tools such as multimeters and oscilloscopes for advanced diagnostics.
 - Collaborated with team members to resolve complex issues efficiently.
 - Completed comprehensive service reports and documentation.
 - Maintained knowledge of industry trends, safety regulations, and equipment standards.
