Hiring Manager
TLD Sherbrooke

January 13, 2025

Dear Hiring Manager,

I am writing to express my interest in the position of Ingénieur électrique - Électrification et Innovation at TLD, as advertised. With a Master's degree in Electrical Engineering and significant hands-on experience in electrical system design and development, I am eager to contribute my skills to your team. Although I am currently in the final phase of obtaining my OIQ permit (CEP), I anticipate completing the process within the next six months. I am confident that my expertise in electrical engineering and my proactive approach to learning new tools will make me a valuable asset to your company.

In my previous roles, I have been involved in designing and modifying electrical subsystems, creating wiring diagrams, and supporting the testing and manufacturing of prototypes. My experience has allowed me to collaborate effectively with internal teams to ensure that projects meet technical requirements, deadlines, and quality standards. While I have not worked with SEE Electrical, AutoCAD, or SolidWorks in the past, I have a strong foundation in electrical design and a proven ability to quickly learn new software tools. I am confident in my ability to rapidly acquire proficiency with these tools and contribute to the design and development of electrical systems.

Additionally, I have gained a comprehensive understanding of electrical systems and their integration into products, with a keen interest in innovation and system optimization. I pride myself on my organizational skills and my ability to communicate effectively with team members from different departments to achieve project objectives. My attention to detail and commitment to quality work will support the success of your team, especially in managing technical projects and ensuring that all designs meet the required standards, including electromagnetic compatibility.

I would welcome the opportunity to discuss how my skills and experience align with the needs of your team. Thank you for considering my application. I look forward to the possibility of contributing to TLD and to advancing my career in electrical engineering and innovation.

Sincerely,

Mahjoub Ghoudi
