Mr. Paul EYERMANN
33 rue Georges Brassens
63118 CEBAZAT
FRANCE

TDL EUROPE
CANADA, SHERBROOKE-QC

Dear Hiring Manager,

I am applying for the VIE Quality Engineer position (VIE235729), as it aligns with my interests in quality and continuous improvement, an international environment, and the aerospace sector.

I hold a master's degree in QSE Risk Management and have 5 years of experience in quality roles. I have led continuous improvement initiatives that reduced the cost of poor quality by over €60k through manufacturing process optimization and the implementation of reliable measurement system.

I previously worked in the US as a Quality Engineer through the VIE program. Although my contract ended in November 2025 for economic reasons, I have confirmed with Business France that I am eligible for a new 18 month VIE. I am motivated to continue developing my international experience while contributing to the performance of TDL Canada.

Proactive, analytical, and communicative, I enjoy working with different departments and supporting problem-solving initiatives (QRQC) to improve performance quality and process efficiency.

I would welcome the opportunity to discuss my application in more detail. Thank you for your time and consideration.

Sincerely,

Paul EYERMANN
